

# Lockout / Tagout equipment assessment

Machine-specific assessments are often completed using a checklist such as the one below. If an energy source is not present, the fields should be marked as not applicable (N/A). This helps to ensure all potential energy sources were assessed.

**Employee performing assessment**

**Date of assessment**

<b>Machine / Equipment Name</b>		
<b>Normal Shutdown Procedure</b>		
Energy Source	Magnitude	Energy Isolation Procedure
Electrical		
Pneumatic (Air)		
Hydraulic		
Water		
Gas		
Steam		
Chemical		
Gravity		
Thermal (Heat/Cold)		
Stored Energy
